# Table of Contents

- 1) Overview
  - labs
- 2) Tooling
- 3) Lifecycle
- 4) Immutability
- 5) REST
- 6) Redux
  - lab
- 7) Routing
- 8) TestUtils
  - lab
- 9) Jest
  - bonus slides
- 10) Flow
  - bonus slides
- 11) Extras
  - bonus slides

# Software Installs

- Google Chrome (if not already installed)
  - from <http://www.google.com/chrome>
- Node.js
  - from <http://nodejs.org>
- Git (if not already installed)
  - from <http://git-scm.com/downloads>
- Your favorite IDE or text editor
  - such as Eclipse, Emacs, IDEA, Sublime, Vim, or WebStorm
  - or use one already installed

# Lab Setup

- Make it easier to get to Windows Explorer and Command Prompt
  - Start ... All Programs ... Accessories
  - right-click "Windows Explorer" and select "Pin to Start Menu"
  - right-click "Command Prompt" and select "Pin to Start Menu"
- Change Windows Explorer to show file extensions
  - Start ... Control Panel ... Appearance ... Folder Options ... View tab
  - uncheck "Hide extensions for known file types"
- Create a directory for your files
  - perhaps named your last name
- Copy example files to your directory
  - `git clone https://github.com/mvolkmann/react-examples.git`
  - can also just download from Github without installing git

# Running Examples

- Code for all examples in the slides and more are in the react-examples Github repo
- Many can be run with these steps
  - `npm install`
  - `npm start`
  - browse localhost:8080
- Others include a Node.js server and/or use a MongoDB database
  - see `README.txt` in each example directory for steps to run

# Syntax Coloring

- Code examples in these slides use
  - `red for functions and methods`
  - `blue for classes`
  - `green for comments`
  - `purple for file paths`
  - `orange for id values`
